**INFORMATION DISCLOSURE STATEMENT**

Sir:

In accordance with 37 C.F.R. 1.98, I am submitting a completed "INFORMATION DISCLOSURE STATEMENT BY APPLICANTS" (*Form PTO/SB/08A*) with patents and/or publications as delineated therein attached.

EP 1 178 271 discloses that an electronic regulating device has a temperature set point transmitting device (12) and a temperature sensor (10) for detecting and recording internal temperature. A regulator (11) relies on deviation to pre-determine the pulse ratio of a permanently pulsed service voltage for cooling equipment (14,15).

DE 197 24 292 discloses the process controls laboratory thermostatic bath systems. Supply of power to the heater is controlled using a pulse width modulation (PWM) technique to switch the alternating current. A semiconductor switch controls current delivered to the heater in successive pulse periods. There are n basic power settings. Each is a fraction, 1/n, of the heater (i.e. element) nominal power. These settings are adjustable by additional control of the semiconductor. Basic power adjustment is effected over successive periods, each amounting to a fraction of the pulse period and comprising at least n half waves.

If no translation of pertinent portions of any foreign language patents or publications mentioned within the "INFORMATION DISCLOSURE STATEMENT BY APPLICANTS" is included with the aforementioned copies of those applications, patents and/or publications, it is because no existing translation is readily available to the Applicants. As per the Notice in 1273 OG 55 (August 5, 2003) no copies of any above-mentioned US patents and US patent application publications are submitted for this application which was filed after June 30, 2003.

Respectfully submitted
